Week 5 Rubric: How Your Worksheets Are Marked

Session 1: Bahrain's Crypto-asset Rulebook, Chapter by Chapter
Session 2: The Central Bank Sandbox Pathway, and Bahrain's Licensed Firms

IT8204 Blockchain and Cryptocurrency | Assessment 2 (A2), the weekly worksheets | Worth 2.50 percent of the course | Deadline for both worksheets: Friday 16 October 2026, 23:59

How your mark is worked out

- Your two Week 5 worksheets are marked together, on the eight criteria in this rubric.
- Each criterion gets a score from 0 to 5. Decimal scores are allowed, for example 3.5.
- Each criterion has a weight. The eight weights add up to 100.
- Your mark for one criterion is the score divided by 5, times the weight. For example, a score of 4 on a criterion weighted 13 gives 4 divided by 5, times 13 = 10.4 marks.
- Your Week 5 mark is the total of the eight, out of 100. It counts for 2.50 percent of the course, inside your A2 total. The course result is decided on your overall course mark.

What each score means

Score	Level	What it means
0	Missing	No evidence / not attempted.
1	Limited	Attempted but cannot give a basic explanation; mostly incorrect.
2	Basic	Below expectation; major gaps.
3	Reasonable	Meets the task; major enhancement still possible.
4	Very Good	Minor enhancement only; valid and well justified.
5	Excellent	Fully meets the task: every required part present, correct and specific.

A 4 sits between the 'Reasonable (3)' and 'Excellent (5)' descriptions below. A 0 means there is no evidence for that criterion.

BAHRAIN POLYTECHNIC بوليتكنك البحرين

The eight criteria

C1. Session 1, Task 2 - your individual build task (weight 13)

What is marked	Session 1 worksheet, Task 2: name the Crypto-asset Module (CRA) chapter that governs fair treatment of retail customers and risk disclosure, and state its requirement.
Excellent (5)	Names the correct chapter. States its requirement in your own words at chapter level: what the licensee must do, and for whom.
Reasonable (3)	Names the correct chapter, but the requirement is copied, too narrow, or only partly explained.
Limited or Basic (1-2)	The wrong chapter, or no chapter named.

C2. Session 2, Task 2 - your individual build task (weight 13)

What is marked	Session 2 worksheet, Task 2: the five sandbox pathway steps, in order, for a Bahraini exchange seeking a Category 4 licence.
Excellent (5)	All five steps are named in the correct order, one line each, for this exchange.
Reasonable (3)	All five steps are listed, but one or two are out of order.
Limited or Basic (1-2)	Fewer than five steps, or the order is mostly wrong.

C3. Session 1, Task 3 - your own write-up of the group activity (weight 13)

What is marked	Session 1 worksheet, Task 3: annotate the sample product, Dilmun Wallet, against the CRA chapters.
Excellent (5)	Every requirement in the product description is tagged to the chapter that governs it. The least intuitive obligation is named with a reason, and licence needs are flagged.
Reasonable (3)	Most requirements are tagged correctly, but some are missing, or the least intuitive obligation has no reason.
Limited or Basic (1-2)	Few requirements are tagged, most tags are wrong, or no licence needs are flagged.

C4. Session 2, Task 3 - your own write-up of the group activity (weight 13)

What is marked	Session 2 worksheet, Task 3: map the Category 4 licence application to the CRA chapters.
Excellent (5)	The pathway is sequenced, the application is mapped to the governing chapters, and the entry point is stated. Three highest-risk obligations are named, each with a reason.
Reasonable (3)	The map is mostly complete, but the risk ranking is not justified or the entry point is missing.
Limited or Basic (1-2)	The map is incomplete or the chapters are mostly wrong. Obligations are listed without any ranking.

C5. Task 1 in both worksheets - the reading questions (weight 16)

What is marked	Task 1 in both worksheets. Session 1 asks which chapters cover custody and the anti-money laundering (AML) Travel Rule, and which obligations are highest-risk. Session 2 asks where an exchange enters the pathway and which licence category fits.
Excellent (5)	Every question is answered in two or three sentences, in your own words. Each answer is correct and explains why, not only what.
Reasonable (3)	All questions are answered and broadly correct. Some answers are one line, repeat the reading, or skip the reason.
Limited or Basic (1-2)	Several questions are missing or wrong, or the answers are copied from the reading.

C6. Analysis and judgement across the week (weight 14)

What is marked	Across the week: judging which obligations carry the most risk, and why.
Excellent (5)	Ranks obligations and explains the ranking by consequence or difficulty, rather than simply listing them.
Reasonable (3)	Some judgement is shown, but the answers mostly describe, or reasons are stated without support.
Limited or Basic (1-2)	Description only, or opinions given with no reasons.

C7. Bahrain and Gulf Cooperation Council (GCC) grounding (weight 10)

What is marked	Across the week: accurate use of Bahrain's rules.
Excellent (5)	Refers to the Central Bank of Bahrain (CBB) rules accurately at chapter level and applies them to the Bahraini exchange or product in the task.
Reasonable (3)	A correct Bahrain or GCC reference is made, but it could be removed without changing the answer.
Limited or Basic (1-2)	No Bahraini rules used, rules misnamed, or another country's rules presented as Bahrain's.

C8. Clear communication, sources and submission (weight 8)

What is marked	Both worksheets: how clear your writing is, the length of each answer, your sources, and submission.
Excellent (5)	Both worksheets are submitted. Answers are clear, plain and close to the expected length for each task. Every source you used is listed in Task 4. Listing is what is marked; APA 7th style is advised, not marked.
Reasonable (3)	Both worksheets are submitted and can be understood. Some answers are far too long or too short, or a source is missing.
Limited or Basic (1-2)	A worksheet is missing, answers are hard to follow, or sources were used but not listed.

Worked example - what a good answer contains

A good answer names the chapter and its scope in plain words, as in the staking worked example, which traced one product to CRA-2, CRA-7, CRA-8 and CRA-12.

Check your own work before you submit

- Read the 'Excellent (5)' description for each criterion, then read your answer.
- Give yourself a score from 0 to 5 on each one. Where your score is below 4, add what the description says is missing.
- Check that both worksheets carry your name and student ID, and that Task 4 lists every source you used.
- Submit both worksheets to the Week 5 weekly worksheets link on Moodle by Friday 16 October 2026, 23:59.
