Week 1 Rubric: How Your Worksheets Are Marked

Session 1: Orientation and the FinTech Ecosystem Map
Session 2: Reading the Chain: a First Block-Explorer Lab

IT8204 Blockchain and Cryptocurrency | Assessment 2 (A2), the weekly worksheets | Worth 1.00 percent of the course | Deadline for both worksheets: Friday 18 September 2026, 23:59

How your mark is worked out

- Your two Week 1 worksheets are marked together, on the eight criteria in this rubric.
- Each criterion gets a score from 0 to 5. Decimal scores are allowed, for example 3.5.
- Each criterion has a weight. The eight weights add up to 100.
- Your mark for one criterion is the score divided by 5, times the weight. For example, a score of 4 on a criterion weighted 13 gives 4 divided by 5, times 13 = 10.4 marks.
- Your Week 1 mark is the total of the eight, out of 100. It counts for 1.00 percent of the course, inside your A2 total. The course result is decided on your overall course mark.

What each score means

Score	Level	What it means
0	Missing	No evidence / not attempted.
1	Limited	Attempted but cannot give a basic explanation; mostly incorrect.
2	Basic	Below expectation; major gaps.
3	Reasonable	Meets the task; major enhancement still possible.
4	Very Good	Minor enhancement only; valid and well justified.
5	Excellent	Fully meets the task + critical insight / self-reflection.

A 4 sits between the 'Reasonable (3)' and 'Excellent (5)' descriptions below. A 0 means there is no evidence for that criterion.

The eight criteria

These are the descriptions your Week 1 worksheets were marked against.

C1. Session 1, Task 2 - your individual build task (weight 13)

What is marked	Session 1 build task: Place these three ecosystem actors on the ecosystem map and justify each placement: a crypto exchange, an open-banking API platform, and the CBB.
Excellent (5)	Completed accurately and fully for session 1, with correct reasoning.
Reasonable (3)	Completed with the main idea correct, though some detail or justification is missing.
Limited or Basic (1-2)	Limited (1): attempted, but cannot give a basic explanation; mostly incorrect. Basic (2): below expectation; major gaps.

C2. Session 2, Task 2 - your individual build task (weight 13)

What is marked	Session 2 build task: For one real transaction you viewed, complete the does/does-not line for at least four fields: what does each field tell you, and what does it NOT tell you?.
Excellent (5)	Completed accurately and fully for session 2, with correct reasoning.
Reasonable (3)	Completed with the main idea correct, though some detail or justification is missing.
Limited or Basic (1-2)	Limited (1): attempted, but cannot give a basic explanation; mostly incorrect. Basic (2): below expectation; major gaps.

C3. Session 1, Task 3 - your own write-up of the group activity (weight 13)

What is marked	Session 1 group activity: Your pair task: place the firm. Own product, on task and evidenced.
Excellent (5)	A complete, well-evidenced individual product that fully meets the session 1 brief.
Reasonable (3)	An individual product that meets the brief, with some gaps in evidence or completeness.
Limited or Basic (1-2)	Limited (1): attempted, but cannot give a basic explanation; mostly incorrect. Basic (2): below expectation; major gaps.

C4. Session 2, Task 3 - your own write-up of the group activity (weight 13)

What is marked	Session 2 group activity: Your pair task: read a real transaction. Own product, on task and evidenced.
Excellent (5)	A complete, well-evidenced individual product that fully meets the session 2 brief.
Reasonable (3)	An individual product that meets the brief, with some gaps in evidence or completeness.
Limited or Basic (1-2)	Limited (1): attempted, but cannot give a basic explanation; mostly incorrect. Basic (2): below expectation; major gaps.

C5. Task 1 in both worksheets - the reading questions (weight 16)

What is marked	Answers the guiding questions for Orientation and the FinTech Ecosystem Map and Reading the Chain: a First Block-Explorer Lab, showing grasp of each core idea.
Excellent (5)	All guiding questions across both sessions answered correctly in the student's own words.
Reasonable (3)	Questions answered and broadly correct, though one session is thin or loosely explained.
Limited or Basic (1-2)	Limited (1): attempted, but cannot give a basic explanation; mostly incorrect. Basic (2): below expectation; major gaps.

C6. Analysis and judgement across the week (weight 14)

What is marked	Argues, analyses or evaluates across the week - not just describes; reasoning is defensible.
Excellent (5)	A clear, defensible analysis or evaluation with reasons, showing L8-level judgement.
Reasonable (3)	Some analysis present, but leans toward description or asserts without full justification.
Limited or Basic (1-2)	Limited (1): attempted, but cannot give a basic explanation; mostly incorrect. Basic (2): below expectation; major gaps.

BAHRAIN POLYTECHNIC بوليتكنك البحرين

C7. Bahrain and Gulf Cooperation Council (GCC) grounding (weight 10)

What is marked	Uses an accurate Bahrain or GCC anchor relevant to the week's tasks.
Excellent (5)	A relevant Bahrain or GCC anchor used accurately and woven into the argument.
Reasonable (3)	An anchor mentioned and broadly correct, if loosely connected.
Limited or Basic (1-2)	Limited (1): attempted, but cannot give a basic explanation; mostly incorrect. Basic (2): below expectation; major gaps.

C8. Clear communication, sources and submission (weight 8)

What is marked	Clear, plain, in scope; both weekly worksheets submitted; sources listed.
Excellent (5)	Clear, plain and well organised; within scope; both weekly worksheets present; sources listed.
Reasonable (3)	Understandable overall; both weekly worksheets present; most sources listed.
Limited or Basic (1-2)	Limited (1): attempted, but cannot give a basic explanation; mostly incorrect. Basic (2): below expectation; major gaps.

Worked example - what a good answer contains

A good placement gives a function-based reason. For example, an exchange sits between customers and the blockchain network. It sits there because it converts money into crypto-assets and holds them under CBB rules. The worked example applies the same reasoning to a remittance app.

Check your own work before you submit

- Read the 'Excellent (5)' description for each criterion, then read your answer.
- Give yourself a score from 0 to 5 on each one. Where your score is below 4, add what the description says is missing.
- Check that both worksheets carry your name and student ID, and that Task 4 lists every source you used.
- Submit both worksheets to the Week 1 weekly worksheets link on Moodle by Friday 18 September 2026, 23:59.
