Why Blockchain Changes Business

IT8204 · WEEK 1 · SESSION 1

Blockchain lowers two fundamental costs — and that changes who can compete.

Cost of Verification

Checking that a transaction is true — without trusting one central record-keeper.

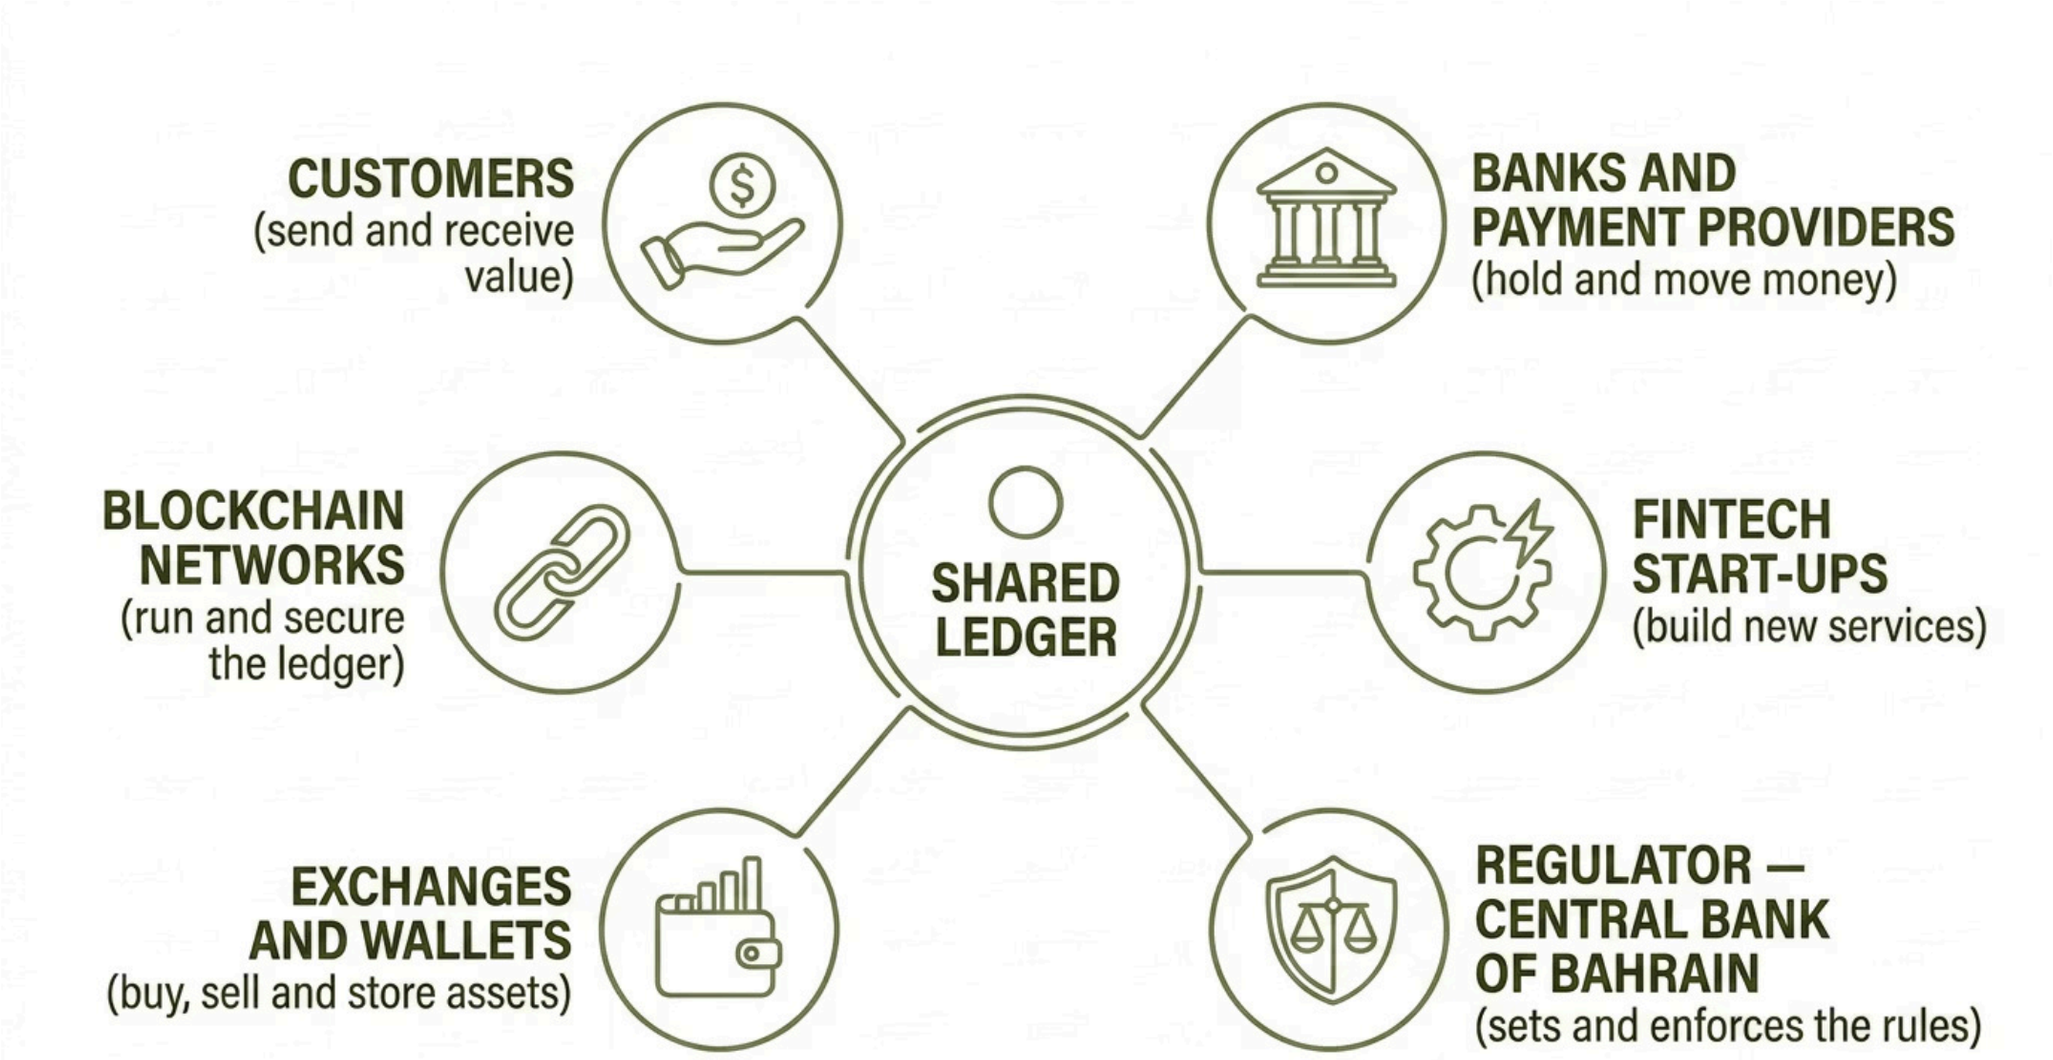

Cost of Networking

Running a marketplace — without handing control to one central intermediary.

Lower costs → more competition, lower barriers to entry, but new governance challenges.

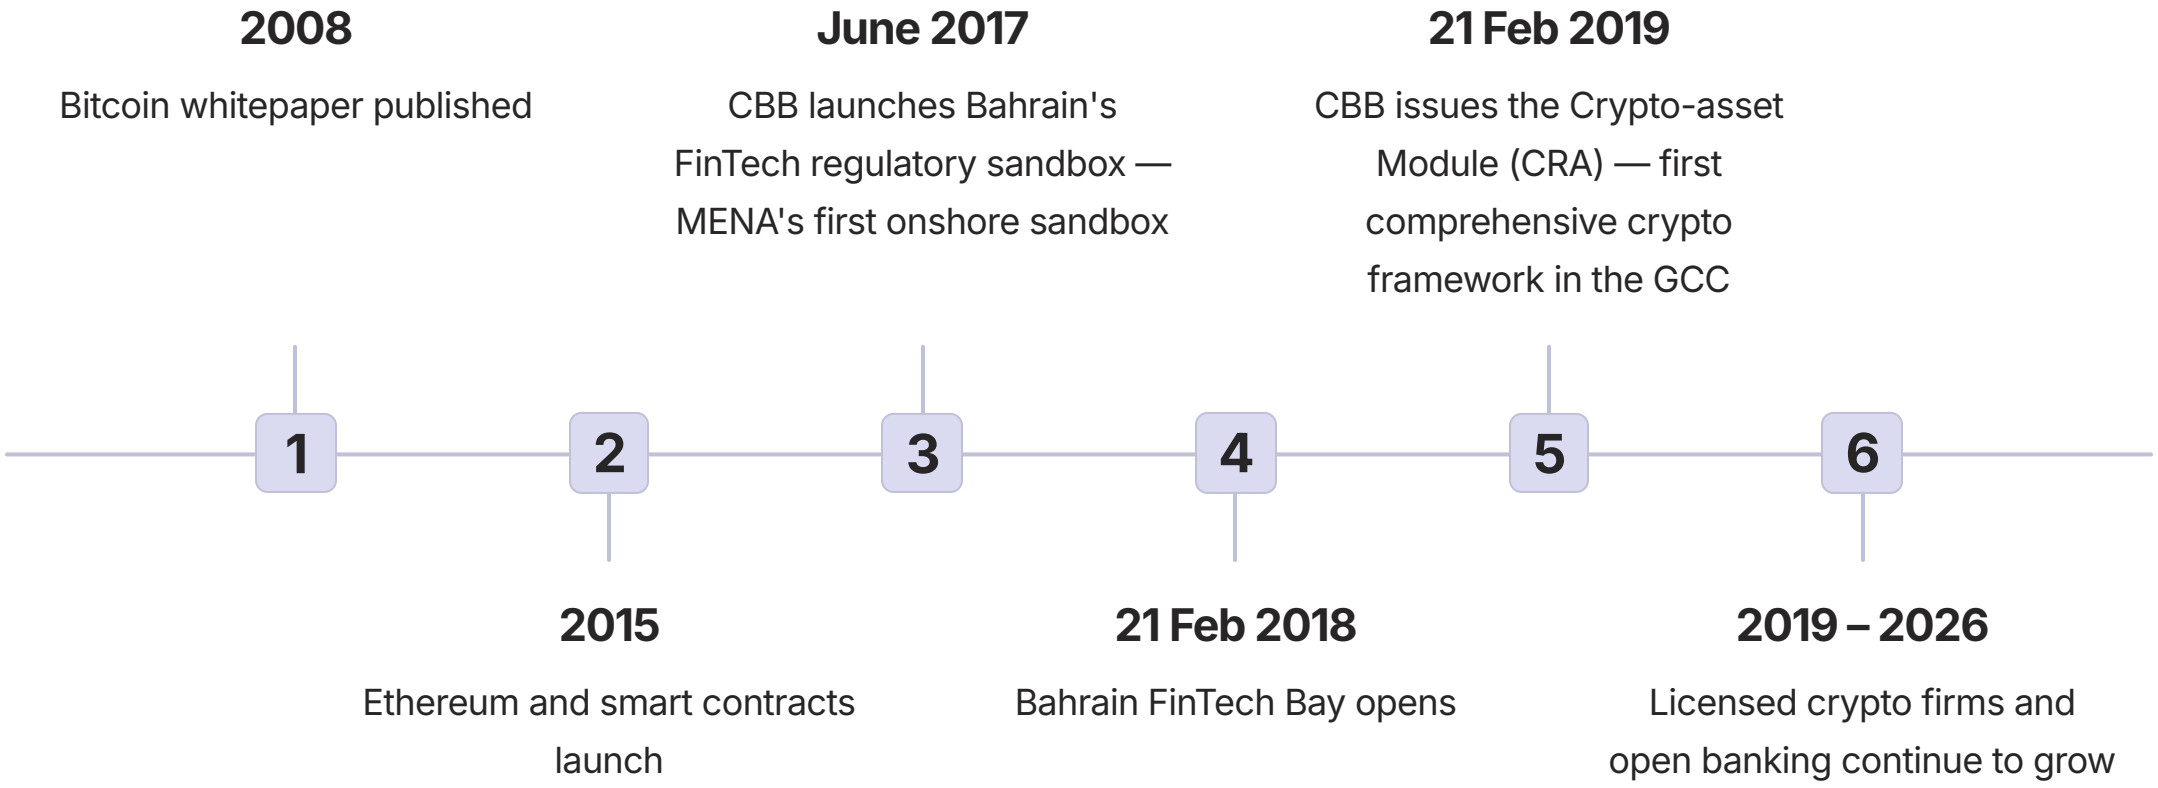

The FinTech Ecosystem Map

Six actors — all connected to one shared ledger at the centre.

Trust and Rules: 2008 – 2026

Key milestones — not just technology, but the building of trust and regulation.

Bahrain & GCC FinTech Firms

Four licensed firms operating in the ecosystem today.

Tarabut Gateway

MENA's first regulated open banking platform. Licensed by the Central Bank of Bahrain.

Beyon Money

Bahrain's digital wallet and remittance super-app.

EazyPay

Bahraini payment gateway. Licensed by the Central Bank of Bahrain.

CWallet

Qatari digital wallet. Licensed by the Qatar Central Bank.
